

SOL

DESIGN: Alegre Design

Sol is a collection of chairs dedicated to community use, which combine comfort, sturdiness and great practicality. The shell, available in many colours, is made of fiberglass-filled polypropylene, and is produced with a perforated or full backrest.

The frames are made of curved welded tubular steel, 20 mm in the four-leg version, 25 mm in the cantilever version, and 12 mm wire in the sled version.

Available also in stool version.
