Monoscocca in polipropilene caricato fibra di vetro. Versione girevole: supporto centrale in alluminio pressofuso pulito o verniciato con polveri epossipoliestere, spessore medio 50 micron. Supporto tavoletta composto da tubo Ø25 mm spessore 1,5 mm, e tubo centrale Ø40 mm spessore 2 mm secondo normativa UNI EN10305-3:2003, saldato a MIG. Il supporto per la tavoletta può avere due altezze, 23 o 28 cm, riferiti alla quota di spazio utile tra seduta e sotto tavoletta. La versione da 23cm ha come optional un carter coprente in polipropilene caricato fibra di vetro. Tavoletta in polipropilene caricata fibra di vetro, ripiano sotto sedia e porta IPAD in polipropilene. Colonna gas Ø50 mm. La base a 5 razze è in alluminio pressofuso, la base a 6 ruote è in nylon caricato fibra di vetro grigio chiaro o antracite, con colonna girevole ed ha uno spazio utile di 23 cm in altezza.

Versione 4 gambe: piedini in polipropilene bianchi o neri. Gambe in tubo tondo Ø 18 mm, spessore 2 mm, secondo norma UNI 10305-3; saldatura a MIG. Finitura cromata con spessore medio di 5 micron, verniciato con polveri epossipoliestere nero o bianco con spessore medio di 50 micron. Impilabilità massima: 5 sedie. Versioni slitta o sgabello: filo Ø11 mm FE360 E4FT-A6 CR (materiale per cromo) piegato e saldato a MIG; cromato con spessore medio di 5 micron, verniciato con polveri epossipoliestere di colore nero e bianco con spessore medio di 50 micron. Impilabilità massima: 5 sedie.

Fibreglass-filled polypropylene one-piece shell. Swivel version: The central support is made of die-cast aluminium and can be plain or epoxy-polyester coated, average thickness 50 micron. The tablet arm support is made of tubular steel Ø25 mm, thickness 1.5 mm, and central tube Ø 40 mm, thickness 2 mm, in compliance with UNI EN10305-3:2003. MIG welded. The support for the tablet can have two heights, 23cm or 28 cm, referred to the useful space between seat and under tablet. The 23cm version has as optional a cover in polypropylene with fibreglass. The tablet is in polypropylene loaded with fibreglass.

The IPAD holder below the seat is made of PP. Gas column diameter 50 mm. 5-star die-cast aluminium base. "Edu basket" base with 6 castors made of fibreglass-filled nylon, with revolving column of 23 cm height. 4-leg version: feet are made of polypropylene, legs in tubular steel Ø 18 mm, thickness 2 mm, in compliance with UNI 10305-3. MIG welded structure. 4-leg chair with or without armrest with chromium-plated finish, average thickness 5 micron, epoxy-polyester coated, average thickness 50 micron. Maximum stackability: 5 chairs. Sled or stool versions are in bent wire-welded steel rod Ø 11 mm FE360 E4FT-A6 CR (for chromium plating), MIG welded. Sled/stool finish: chromium-plated, average thickness 5 micron, epoxy-polyester coated, average thickness 50 micron. Maximum stackability: 5 chairs.
